1

OVERVIEW

Executive summary

Albadi operates a production-grade sales platform. Customers design non-woven bags in real-time 3D, receive factory-accurate ILS pricing, and download branded PDF quotes. Every submission creates or updates a CRM lead. Operators manage the full cycle — WhatsApp conversations, pipeline, factory quotes, bot draft approval, and personalized 3D designer links.

BOT + FOLLOW-UPS

1×

SHARED ENGINE

Single-engine pattern: bag-quote-app embeds the CRM-hosted configurator in an iframe. Pricing rules, color catalog, PDF layout, and lead persistence all live on `albadi-crm` — update once, both channels benefit.

What each audience gets

Customers (website)

- 44 fabric colors with live 3D preview
- Logo upload — PNG, JPG, SVG up to 8 MB
- Live ILS quote by size, quantity, shipping
- PDF quote + PNG snapshot + 360° video export

Operators (CRM dashboard)

- Command Center with prioritized work queues
- WhatsApp inbox + manual reply + LLM suggestions
- Send 3D Designer link with session token
- Pipeline Kanban, factory quotes, draft approval

Analytics & Settings	SHIPPED	/dashboard/v3/analytics
Send 3D Designer via WhatsApp	SHIPPED	Lead overview / chat

WhatsApp automation

FEATURE	STATUS	NOTES
Bridge messaging	SHIPPED	USE_BRIDGE=1
9-step questionnaire	SHIPPED	Auto-quote on completion
Intent + decision handlers	SHIPPED	Post-quote inbound
LLM supervisor + decision log	SHIPPED	Operator feedback in dashboard
Automated follow-ups	SHIPPED	Quiet hours 21:00–09:00 Israel
Meta Lead Ads import	SHIPPED	Google Sheets → API
LLM follow-up supervisor	SHIPPED	Context-aware cadence override
Re-engagement loop	SHIPPED	NO_RESPONSE_REENGAGE stage

System architecture

One shared engine on albadi-crm powers the public website iframe, pricing APIs, CRM dashboard, and WhatsApp automation.

DIAGRAM 3.1 – PLATFORM TOPOLOGY

The website never duplicates configurator logic – it embeds the CRM-hosted designer and calls CRM APIs.

Technology stack

LAYER	TECHNOLOGY	NOTES
Frontend	Next.js 16, React 19	Paper & Ink design tokens
3D engine	Three.js, React Three Fiber, drei	GLB bag model + logo decal
Database	Neon PostgreSQL, Drizzle ORM	Leads, messages, designs, bot logs
Messaging	whatsapp-bridge-node	HMAC webhook, dedupe, audit log
CRM sync	GoHighLevel webhooks	Stage, tags, resync catch-all
Deploy	Vercel	Auto-deploy from <code>main</code>

DIAGRAM 3.2 – DATA FLOWS

3b. CRM dashboard modules

DIAGRAM 3.3 – DASHBOARD V3 NAVIGATION

4

PRODUCT

3D Configurator — specification

Full-screen designer at `/configurator` — standalone, embedded on the customer website, or opened via WhatsApp session link.

Fabric & Color

44 swatches in a scroll rail (keen-slider). Live GLB material update, SKU copy, orbit/zoom on bag mesh.

Logo

PNG / JPG / SVG up to 8 MB. 3D decal with scale, position, rotation. Real-time preview on bag front.

Quote & PDF

Size presets + custom, quantity tiers, shipping method. Live ILS factory price. Branded PDF with design snapshot.

Toolbar exports

Reset view, auto-rotate, PNG snapshot, fullscreen, 360° MP4 video export for sales follow-up.

Technical specification

CAPABILITY	DETAIL
3D model	GLB bag mesh, React Three Fiber + drei, Paper & Ink UI chrome
Color catalog	44 fabric swatches — shared JSON catalog, same SKUs as factory
Logo handling	Client-side decode → canvas texture → decal projection on mesh
Pricing engine	<code>GET /api/configurator/quote</code> — same calculator as bot + dashboard
Lead capture	<code>POST /api/configurator/designs</code> — phone E.164, design JSON, PDF blob
Session tokens	14-day TTL, pre-fill name/phone from CRM, <code>?t=<token></code> URL param
Phone dedupe	E.164 normalization + last-9-digit fuzzy match on upsert
Responsive layout	Compact dock on mobile, full toolbar on desktop, iframe-safe height

Operator → customer flow: Send 3D Designer from lead card creates a session token and WhatsApp CTA. Customer opens link, design is pre-associated with the lead. PDF submit updates the same record.

Sessions & persistence

- **CRM → customer:** WhatsApp link with `?t=<token>` , 14-day session, pre-filled contact fields.
- **Customer → CRM:** PDF submit upserts lead by phone, saves design row, sets stage `INTAKE` , tags source `website_configurator` or `crm_3d_link` .
- **Saved designs:** Visible on lead Overview tab — color, logo thumbnail, quote total, re-open link.

DIAGRAM 4.1 – CONFIGURATOR TABS & EXPORT PATHS

All export paths persist to the same lead record – operators see designs immediately in the dashboard.

5

INTEGRATION

Customer website embed

bag-quote-app renders a full-viewport iframe to the CRM configurator – zero duplicated pricing, color catalog, or PDF logic.

bag-quote-app (Expo web)

- Route: `/configurator`
- Full-viewport iframe to CRM URL
- `postMessage` height sync for mobile
- Deployed: `albadi.ecobrotherss.com`

albadi-crm (engine)

- Hosts 3D designer + APIs
- Lead upsert on PDF submit
- Session tokens for operator links
- Deployed: `albadi-crm.vercel.app`

Environment variables (website repo)

VARIABLE	PURPOSE
EXPO_PUBLIC_CONFIGURATOR_URL	iframe src — CRM /configurator
EXPO_PUBLIC_CONFIGURATOR_API_URL	CRM API base for quote calls

Update once, both channels benefit: change a margin in CRM Settings → configurator, WhatsApp bot, and calculator all recalculate with the new rules.

CRM Dashboard v3

Production UI labels appear in Hebrew in screenshots (Section 10); all features below are fully operational in English-capable backend.

Command Center

Prioritized work queues — drafts pending, factory waits, high-value leads, stale conversations.

Conversations

WhatsApp inbox, thread composer, order summary sidebar, Send 3D Designer action.

Leads

Sortable grid, configurator source badge, phone search, deep links to lead detail.

Pipeline

Kanban by sales stage — drag to move, synced bidirectionally with GoHighLevel.

Drafts

Money-moment bot replies queued for operator approve/edit before WhatsApp send.

Factory · Calculator · Analytics

Factory quote lifecycle, standalone pricing tool, funnel KPIs, margins & templates in Settings.

Lead detail — tab reference

TAB	CONTENTS	OPERATOR ACTIONS
Overview	Stage, flags, notes, quote total, saved 3D designs	Send 3D Designer, pause bot, snooze, stage override
Chat	Full WhatsApp thread with sender attribution	Manual reply, LLM suggested replies
Order summary	Questionnaire spec (size, qty, shipping, colors)	Read-only — bot-collected fields
Bot decisions	Supervisor classification log with reasoning	Operator feedback thumbs up/down
Activity	Timeline — link sent, design saved, stage changes	Audit trail for handoffs

Authentication & access

Dashboard protected by `ADMIN_PASSWORD` (session cookie). All write actions route through server actions in `app/actions/v2.ts` — stage changes, manual WhatsApp replies, draft approval, contact edits.

WhatsApp bot & pipeline

All WhatsApp I/O runs through the self-hosted bridge. Tags, pipeline state, and custom fields live in Neon Postgres — GHM mirrors shared fields via webhooks.

9-step questionnaire (new leads)

STEP	QUESTION	OUTCOME
1–2	Opening + trust context	Bot introduces Albadi, sets expectations (~2 min)
3	Shipping method	Express (~25d) or sea (~90d)
4	Quantity	1k / 3k / 5k / 10k or custom amount
5	Bag size	6 popular presets, extended list, or custom HxD×W
6	Handles	With or without
7	Lamination	Premium finish yes/no
8	Logo colors	1, 2, or 3 print colors
9	Confirmation gate	Summary review → auto-price + quote send → INTAKE

Pipeline stages

NULL	Questionnaire in progress — first inbound, no quote yet
INTAKE	Auto-quote sent — awaiting customer engagement
DISCOVERY	Discovery / commitment call with salesperson
FACTORY_WAIT	Non-standard spec — factory estimate in flight
CONSIDERATION	Final quote in customer hands — negotiation
WON / LOST	Terminal — payment confirmed or explicit refusal

Side stages (manual drag only): **FUTURE_FOLLOW_UP**, **NO_RESPONSE_REENGAGE**

DIAGRAM 7.1 – SALES PIPELINE STAGES

Side stages (manual): FUTURE_FOLLOW_UP, NO_RESPONSE_REENGAGE

DIAGRAM 7.2 – INBOUND MESSAGE ROUTING

Money moments (negotiating, reject, spec change) generate a draft for operator approval when `ENABLE_DRAFT_QUEUE=1` .

8

HOW TO USE

End-to-end workflows

Two primary paths — self-service website visitors and operator-initiated 3D designer links. Both converge on the same CRM lead record.

Website visitor (self-service)

1. Open albadi.ecobrotherss.com/configurator
2. Pick color → upload logo → configure quote
3. Enter contact → download PDF
4. CRM upserts lead, saves design

Operator 3D link

1. Sign in → open lead in Leads or Conversations
2. Click Send 3D Designer → WhatsApp CTA
3. Customer completes design + PDF
4. Record updates, designs on lead card

DIAGRAM 8.1 – WEBSITE VISITOR (SELF-SERVICE)

DIAGRAM 8.2 – OPERATOR SENDS 3D DESIGNER LINK

9 TECHNICAL

Data model & integrations

Neon PostgreSQL is authoritative for bot-internal state. GoHighLevel owns shared contact fields – DB mirrors via webhooks with idempotent merge.

Core database entities

TABLE	PURPOSE	OWNER
leads	Contact, pipeline stage, q_state, quote totals, bot flags	DB (+ GHL sync for shared fields)
messages	WhatsApp thread – sender: lead / bot / eli	DB only
configurator_designs	Saved 3D sessions – color, logo, quote JSON	DB only
bot_drafts	Pending operator-approved replies	DB only
bot_decision_log	Supervisor classifications + reasoning	DB only
factory_quote_requests	Factory estimate lifecycle	DB only
bridge_events	Webhook audit + dedupe by evt_id	DB only
lead_tags	Tag membership by Hebrew name	GHL → DB mirror

Integration matrix

SYSTEM	DIRECTION	WHAT SYNCs
WhatsApp Bridge	Inbound + outbound	Messages, contact enrichment, HMAC webhook
GoHighLevel	Bidirectional	Stage, tags, name, phone, notes, tasks, opp value
bag-quote-app	Embed only	iframe → CRM configurator, no local persistence
Meta Lead Ads	Inbound	Google Sheets → API import
Vercel Cron	Scheduled	Hourly bot classifier via <code>/api/bot/cron</code>

Security notes

Webhook verification

- Bridge: HMAC-SHA256, 5-min replay window
- Bot APIs: Bearer `BOT_SECRET`
- GHL: signed payload validation

Data handling

- Phone stored E.164 only
- Logo uploads client-side, not persisted raw
- Env secrets on Vercel — never in client bundle

Product screenshots

Production captures from the live build. Each figure appears full-width on the following page – 15 screens covering configurator, website, and CRM.

#	SCREEN	WHAT IT SHOWS
10.1	Configurator — Color	3D preview, fabric swatches, tab dock
10.2	Configurator — Logo	Logo upload and placement controls
10.3	Configurator — Quote	ILS pricing, contact form, PDF download

Figure 10.7

CRM DASHBOARD

Lead detail

Expanded lead view — overview, saved 3D designs, Send 3D Designer, and operator tools.

The screenshot displays the 'Lead Detail' view in a CRM system. At the top, there's a navigation bar with the lead ID '972525551234' and a title 'ליד מקומי בדיקה'. Below this, a horizontal bar contains several tabs: 'מקור website_configurator', 'עדיפות חמים', 'מחזור חיים כשיר', 'הצעת מחיר ₪2,850', 'בוט פעיל', and 'סטטוס טיפול בוט מטפל'. A 'פעולה הבאה לעקוב' (Next Action to Follow) section is also visible.

The main content area is divided into several sections:

- Lead Information:** Includes the lead ID '972525551234', a 'שאלון + הצעה אוטומטית' (Questionnaire + Automatic Offer) button, and a 'כרטיס מלא + החלטות בוט' (Full Card + Bot Decisions) button.
- Actions and Tools:** A 'פרטי קשר' (Contact Details) section with a 'ליד מקומי בדיקה' (Local Lead Check) button and a 'שחזר פרטי קשר' (Recover Contact Details) button. Below this, a 'פעולות' (Actions) section includes buttons for 'שלח תבנית' (Send Template), 'מעצב 3D' (3D Designer), 'WhatsApp', and 'הבוט פעיל' (Active Bot).
- CRM History:** A 'תקדים CRM' (CRM History) section with a 'לחזור לליד' (Return to Lead) button and a 'צור משימה 24 ש' (Create Task 24h) button. It also includes a 'פתח SLA 2 ש' (Open SLA 2h) button and a 'שחזר 1000 יח' p1' (Recover 1000 units p1) button.
- Filters and Search:** A 'סיבת ניקוד' (Scoring Reason) filter and a '3D (1)' (3D (1)) filter.

On the right side, there's a sidebar with a user profile 'אלבדי Supervisor' and a list of navigation items: 'חדר בקרה' (Control Room), 'שיחות' (Calls), 'לידים' (Leads), 'אישורים' (Approvals), 'תור פולואפים' (Follow-up Queue), 'הצעות מפעל' (Factory Offers), 'מחשבון' (Calculator), 'אנליטיקה' (Analytics), and 'הגדרות' (Settings).

Regenerate this document

From the albadi-crm repo: `pnpm docs:handover` captures fresh screenshots + generates PDF. PDF only: `pnpm docs:handover-pdf`. Requires local CRM on port 3000 and network for fonts/Mermaid CDN.

Sign-off

All integration points from the project brief are implemented and verified in production. Interactive 3D replaced the originally discussed video approach — faster iteration, better customer UX, and operator-visible saved designs.

WEBSITE EMBED

3D CONFIGURATOR

CRM DASHBOARD

WHATSAPP BOT

Delivered scope

Customer-facing

- 44-color 3D configurator with logo upload
- Live ILS pricing + branded PDF export
- PNG snapshot + 360° video export
- Website iframe embed (bag-quote-app)
- Automatic CRM lead capture on PDF submit

Operator-facing

- Full CRM dashboard v3 (10 modules)
- WhatsApp inbox + manual reply + suggestions
- Send 3D Designer with session tokens
- Bot draft approval on money moments
- Pipeline Kanban synced with GoHighLevel

Recommended go-live checklist

1. Confirm production DNS and `CONFIGURATOR_PUBLIC_URL` on Vercel matches `albadi.ecobrotherss.com`.
2. Walk through operator flow: Send 3D Designer → customer PDF → lead update in dashboard.
3. Monitor first website PDF submissions in the Leads grid (source badge: website configurator).
4. Verify WhatsApp bridge webhook is receiving inbound messages (check `bridge_events` table).
5. Confirm GHL stage sync — drag a test lead in pipeline, verify GHL opportunity updates.
