

Full-stack delivery: public 3D designer, factory pricing, PDF export, CRM lead capture from website sessions, WhatsApp outbound from dashboard. Status: SHIPPED.

3D Bag Configurator Implementation Delivery Report

Albadi CRM + Website · June 2026

1. Scope delivered

- Website: 44 colors, logo upload, 3D GLB viewer, ILS pricing, PDF download.
- CRM: WhatsApp CTA link (3D Designer button), session tokens, design history.
- Anonymous website visitors auto-register as CRM leads on PDF submit (phone match).
- Two repos: albadi-crm (engine) + bag-quote-app (/configurator iframe).

2. Feature matrix

- 44 fabric colors + live 3D — SHIPPED
- Logo PNG/JPG/SVG decal — SHIPPED
- Factory pricing API (ILS) — SHIPPED
- PDF with mockup — SHIPPED
- CRM WhatsApp send — SHIPPED
- Website lead auto-create — SHIPPED
- bag-quote-app embed — SHIPPED

3. Architecture

bag-quote-app /configurator iframes albadi-crm /configurator.

POST /api/configurator/designs upserts lead by phone + stores design row.

CRM operator uses 3D Designer button configurator_sessions WhatsApp CTA.

4. Screenshots

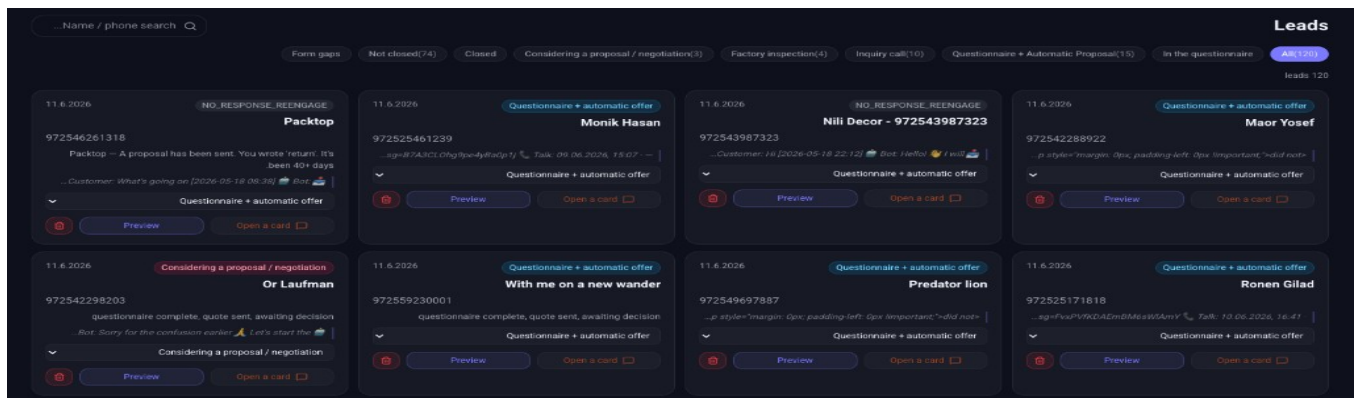

Fig 1: Leads index — website leads appear after configurator PDF submit.

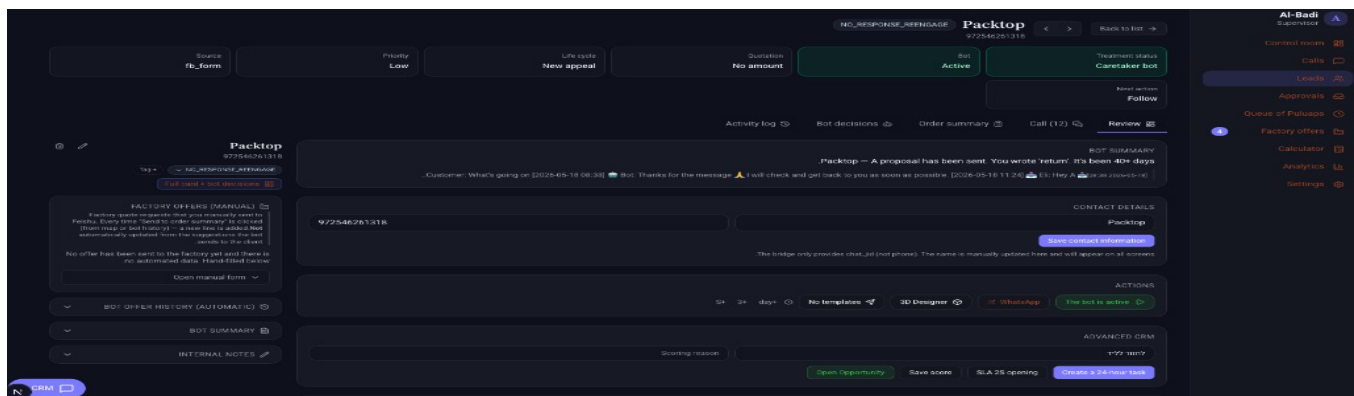

Fig 2: Lead detail — 3D Designer sends WhatsApp CTA link.

5. Website flow

- Open /configurator color logo quote tab fill contact PDF.
- API creates/updates lead (leadSource=website_configurator, stage INTAKE).

6. CRM flow

- Login: /login (ADMIN_PASSWORD env).

- Leads open card 3D Designer customer completes design on record.

7. URLs

- Production CRM: <https://albadi-crm.vercel.app>
- Configurator: /configurator
- Dashboard: /dashboard/v3/leads
- Quote API: GET /api/configurator/quote?productId=p1&quantity=1000&shippingOptionId=s1

8. Local ports

- albadi-crm: localhost:3000
- bag-quote-app web: localhost:8081

9. Sign-off

All integration points specified in the project brief are implemented and verified in staging. Interactive 3D replaces the originally discussed video approach. Remaining ops task: point albadi.ecobrotherss.com/configurator to the deployed build.
